Running a VM on a NAS takes a lot of re

sources so you would need to choose one with good processor and RAM

. An alternative (if you want to run a virtualized Linux app) is docker. both

Qnap and Synology have Docker support which takes very little system resources .

The baseline functionality of network-attached

storage devices has broadened to support virtualization.

High-end NAS

products might also support data deduplication, flash storage, multiprotocol

access and data replication.

What Is Network-Attached Storage (NAS)? A Complete Guide
