💸 Running a VM on a NAS takes a lot of re

sources so you would need to choose one with good processor and RAM

. An alternative (if you want to run a virtualized Linux app) is docker. both Qnap and Synology have Docker support which takes very little system resources .

Should I use

a separate VM or physical machine as a NAS ... - Quora

The baseline functionality of network-attached storage devices has broadened to support virtualization.

High-end NAS products might also support data deduplication, flash storage, multiprotocol access and data replication.
