Meaning a thousand. For this reason, you will often see CPM referred to as cost per thousand impressions, and for the acronym of the United States of America, it is often referred to as CPM. The cost per mille (CPM) is the cost a marketer will pay for one thousand impressions of an advertisement. It is a common metric used in advertising to measure the cost of reaching a target audience. CPM is calculated by dividing the total cost of an advertisement by the number of impressions divided by 1,000. For example, if an advertisement costs \$100 and is shown 10,000 times, the CPM would be \$100 / (10,000 / 1,000) = \$10. CPM is used to compare the cost of different advertising campaigns and to determine the most cost-effective way to reach a target audience. It is also used to measure the return on investment (ROI) of an advertising campaign. CPM is a key metric for advertisers and marketers, and it is used to evaluate the performance of their advertising campaigns. CPM is a common metric used in advertising to measure the cost of reaching a target audience. It is calculated by dividing the total cost of an advertisement by the number of impressions divided by 1,000.
