

O O bet365

Oxo is a simple computer game consisting of a 3x3 grid of dots. In 1952, OXO (or Number 5 And Crosses), developed by British computer scientist Douglas Engelbart for an EDSAC computer at the University of Cambridge, became the first computer game. It is known as the first computer game. The word "Oxo" is derived from the Latin word "Rostane" which means "wheel".
