<p>ido por DEUS. & Conheça Asher! 😄 Tasha Cobbs Leonard dá as boas-vindas ao primeiro filho</p>
<p></p><p>To fully exploit the constrained width, avoid loading the neighbouring structures and straddle shared utilities running under the site, the 🏵 house was constructed using a lightweight steel frame on a piled slab. The steelwork was prefabricated as a series of 🏵 portal frames that were craned down the alley and site-welded together. Given that every inch in such a narrow space 🏵 was valuable we chose to fully weld the connections and express the frame internally, even utilising the depth of the 🏵 steels to maximise the space.</p>
<p>Alongside the painted steel a simple palette of spruce plywood, douglas fir joists, terrazzo and cork 🏵 flooring enriches the interior. Externally the timber framed walls are clad in handmade pewter glazed brick slips with a patina 🏵 that reflects the changing light of the sky. Both the simply landscaped and planted rear courtyard and the garden in 🏵 front of the house enhance the feeling of space in this small dwelling.</p>
<p>This self-build project had a long gestation, fitted 🏵 in around professional and family life. The design and construction were developed as time and money allowed so whilst planning 🏵 consent was given in January 2014 and the ground works commenced in the spring of 2024, the building was not 🏵 completed until August 2024. We worked closely with friend and joiner Michael Tye to lead a small team of local 🏵 subcontractors and employed specialist fabricators for certain key packages as well as undertaking a fair amount of the work ourselves.</p>
<p>The 🏵 result is a unique and highly crafted home that is a testament to the commitment, effort and support of many 🏵 people. By replacing a narrow disused alley with this comfortable small home we hope to have enhanced the streetscape we 🏵 inhabit. As the building completes the terrace, so does the front garden - with the simple bin store, planting, level 🏵 access and bike parking we aimed to keep it open and reinforce the pavement line without making a hard boundary. 🏵 The development highlights the viability, both economically and spatially of small brownfield sites to provide
