Person

0 0 bet365

There are two ways to roll a 1 and a 20 on a pair of dice.

One way is to roll a 1 on the blue die and a 20 on the green die.

Another way is to roll a 20 on the blue die and a 1 on the green die.

There are 400 possible outcomes when rolling two dice, 200 of which result in a 1 or a 20.

Therefore, the probability of rolling a 1 or a 20 is  $\frac{200}{400} = \frac{1}{2}$ .

There are 2400 possible outcomes when rolling two dice.

There are 1200 outcomes that result in a 1 or a 20.

Therefore, the probability of rolling a 1 or a 20 is  $\frac{1200}{2400} = \frac{1}{2}$ .

There are 2000 possible outcomes when rolling two dice.

There are 1000 outcomes that result in a 1 or a 20.

Therefore, the probability of rolling a 1 or a 20 is  $\frac{1000}{2000} = \frac{1}{2}$ .

There are 2000 possible outcomes when rolling two dice.

There are 1000 outcomes that result in a 1 or a 20.

Therefore, the probability of rolling a 1 or a 20 is  $\frac{1000}{2000} = \frac{1}{2}$ .

There are 2000 possible outcomes when rolling two dice.

There are 1000 outcomes that result in a 1 or a 20.

Therefore, the probability of rolling a 1 or a 20 is  $\frac{1000}{2000} = \frac{1}{2}$ .

There are 2000 possible outcomes when rolling two dice.

There are 1000 outcomes that result in a 1 or a 20.

Therefore, the probability of rolling a 1 or a 20 is  $\frac{1000}{2000} = \frac{1}{2}$ .
