It's a bit of a surprise that the storage requirements for Call of Duty: Black Ops Cold War are so high, considering that the game is only 175 GB in size. However, the game's storage footprint is on par with last year's game, Call of Duty: Modern Warfare 3, which also required 250 GB of storage space. This is due to the game's use of 4K textures and other high-resolution assets. For players with the beefiest of PCs who want to play Call of Duty: Black Ops Cold War with 4K textures, that'll swallow up 250 GB of storage space. Call of Duty can now take up over 200GB of space, but it's complicated.
