&lt;p&gt;Parab&#233;ns&lt;/p&gt;  
&lt;p&gt;&lt;/p&gt;&lt;p&gt;The Poki can charge and recharge at 2.1amps. This me  
ans you re not stuck for 20+ hours charging a 10,000mAh battery &#127817; at 50  
0mA. At 2.1 amp you should be able to charge this in under five hours and with 9  
0% conversion &#127817; efficiency you should have around 9000mAh of actual jui  
ce to spare. That should be enough for at least three complete &#127817; charge  
s from dead to full for any smartphone on the market today.&lt;/p&gt;  
&lt;p&gt;The Poki also has a 10-LED power indicator. While &#127817; I haven t  
paid close enough attention to the battery as it drains, it does appear that it  
s calibrated at least &#127817; somewhat close, unlike other batteries that sta  
y on 4 (full,) and then drop to a blinking 1 about 12 seconds &#127817; before  
the battery dies.&lt;/p&gt;  
&lt;p&gt;The Poki 10,000 mAh portable charger claims to be 100% compatible with  
all USB-based devices for charging, &#127817; so as long as you ve got a charge  
r cable, or can use the MicroUSB cable that s evidently included, you should &#1  
27817; be set with any device.&lt;/p&gt;  
&lt;p&gt;The Poki 10,000 mAh has an MSRP ofR\$79.99, but as most of those things  
go you &#127817; can get it on Amazon forR\$30.99.&lt;/p&gt;  
&lt;p&gt;Pocketables does not accept targeted advertising, phony guest posts, pa  
id reviews, etc. Help us keep &#127817; this way with support on Patreon!&lt;/p  
&gt;
