Given odds against of an event say A is give to be 7 : 2, therefore probability of event A is  $P(A) = \frac{2}{(7+2)} = \frac{2}{9}$  and

probability of event B is  $P(B) = \frac{7}{(7+2)} = \frac{7}{9}$ . If it is as in favor of event A, the probability of event B is  $\frac{7}{9}$ .

Although both terror and horror imply extreme fear or the presence of danger or evil, they have a slight difference in usage. Terror is typically used in anticipation of a danger that's in the future. This intense dread or panic is a reaction to something that could or is going to happen.
