In multiplayer games, &#226;in-game chat allows players to communicate with others in real time

, making interactions seamless. The mode of communication can be text, voice, or video.

In-game chat is &#226;usually text- or voice-based. Players can type message or transmit their voices through the game and other people in the game

can choose to read or hear it. In-game chat doesn&#39;t involve video. You won&#39;t be able to see the faces of the people you are chatting with.
